

Today / Journey overview

PURPOSE

Understand the current journey before choosing a service.

KEY ELEMENTS

Origin and destination; service alert; journey-specific priorities; recommendation confidence.

INTERACTION

Select a priority or scroll to compare Take, Wait and Switch.

PROTOTYPE SCOPE

All service conditions and confidence values are fictional.

Today / Compare options

PURPOSE

Compare the consequences of taking, waiting or switching.

KEY ELEMENTS

Arrival time; total duration; seating or boarding likelihood; walking; transfers.

INTERACTION

Choose an option, or open Why? to inspect its rationale.

PROTOTYPE SCOPE

Outlined recommendation reflects the demo ranking, not live routing.

Today / Need a seat

Predictions combine current services with your journey preferences. Always follow official transport advice.

Today

Trips

Priorities

PURPOSE

Make comfort part of the current decision.

KEY ELEMENTS

The selected priority has an outlined, underlined state. The recommended route can change.

INTERACTION

Toggle Need a seat; compare the updated recommendation.

PROTOTYPE SCOPE

Journey chips affect demo ranking; preference sliders do not.

390 × 844 portrait viewport · white canvas / outline-only UI

03 / 17

Today / Normal service

PURPOSE

Compare options when the usual service is running normally.

KEY ELEMENTS

Normal-service scenario; 91% demo confidence; direct and alternative routes.

INTERACTION

Compare the next train with waiting or switching.

PROTOTYPE SCOPE

A scenario variation of Today, not a separate navigation page.

Today / Full bus

PURPOSE

Make boarding uncertainty visible before committing.

KEY ELEMENTS

Capacity scenario; boarding constraints; next bus, following bus and alternative bus.

INTERACTION

Compare the risk of waiting with the extra walking of switching.

PROTOTYPE SCOPE

Boarding likelihood is illustrative rather than a capacity prediction.

Explanation / How it works

PURPOSE

Explain the basis of the recommendation.

KEY ELEMENTS

Current conditions; journey context; confidence and uncertainty.

INTERACTION

Close the sheet using the handle, Got it, backdrop or Escape.

PROTOTYPE SCOPE

Explanatory overlay from the existing demo.

Explanation / Take

PURPOSE

Explain why taking the next train may suit this journey.

KEY ELEMENTS

Route-specific rationale alongside context and confidence explanations.

INTERACTION

Read the trade-off, then return to the option list.

PROTOTYPE SCOPE

In this scenario: fastest, but a seat is unlikely.

Explanation / Wait

PURPOSE

Explain the potential benefit of waiting.

KEY ELEMENTS

Queue-clearing rationale and the effect of current context.

INTERACTION

Return to the list to compare or choose the waiting option.

PROTOTYPE SCOPE

The queue-clearing statement is fictional demo content.

Explanation / Switch

PURPOSE

Explain the trade-off in changing routes.

KEY ELEMENTS

Reliability benefit; extra walking; one transfer.

INTERACTION

Return to the options and make a decision.

PROTOTYPE SCOPE

No map or navigation flow exists in the source prototype.

Feedback / Decision saved

PURPOSE

Acknowledge the selected commute option.

KEY ELEMENTS

A short confirmation with the chosen action and arrival reference.

INTERACTION

Continue reviewing the journey after the message dismisses.

PROTOTYPE SCOPE

Session-only feedback: no persistent saving or real monitoring.

My week / Office day

PURPOSE

View a weekly routine and its outbound and return journeys.

KEY ELEMENTS

Seven-day selector; office-day journey pair; saved routine templates.

INTERACTION

Choose another day; use Today to return to route comparison.

PROTOTYPE SCOPE

Change journey opens this screen; it does not apply a saved route.

My week / University day

PURPOSE

Support different destinations and schedules across the week.

KEY ELEMENTS

University-day outbound and return journeys; scheduled times.

INTERACTION

Select another weekday to inspect its routine.

PROTOTYPE SCOPE

Wednesday repeats office; Thursday uses later university times.

My week / Remote day

PURPOSE

Represent a day without a commute.

KEY ELEMENTS

Remote-day label; no-commute state; reusable routine templates.

INTERACTION

Use + to see the routine-editor placeholder.

PROTOTYPE SCOPE

Notification pausing is descriptive only in this demo.

My week / Personal trip

PURPOSE

Show a flexible weekend journey.

KEY ELEMENTS

One outbound journey; personal-trip category; departure time.

INTERACTION

Switch days or return to Today.

PROTOTYPE SCOPE

A single-leg routine is retained from the source prototype.

My week / No routine

PURPOSE

Show the empty state for an unscheduled day.

KEY ELEMENTS

No saved Sunday journey; guidance to add one.

INTERACTION

Use + to inspect the available editor feedback.

PROTOTYPE SCOPE

The prototype does not implement a complete create/edit form.

Feedback / Routine editor

PURPOSE

Indicate the intended next step for adding a routine.

KEY ELEMENTS

Placeholder feedback describes choosing days and adding journey legs.

INTERACTION

Dismisses automatically; Edit week triggers the same feedback.

PROTOTYPE SCOPE

This is a placeholder, not a working routine editor.

Priorities / Default preferences

PURPOSE

Express default priorities separately from today's context.

KEY ELEMENTS

Arrival time, seat chance and reliability sliders; learning and alert toggles.

INTERACTION

Move a slider or switch a toggle to see its visible state.

PROTOTYPE SCOPE

Controls are visual-only and do not persist or affect route ranking.
